DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group II, claims 10-12 in the reply filed on 11/1/2005 is acknowledged. The traversal is on the grounds that the motor and the method of cleaning the motor are inseparable is not persuasive. The motor apparatus does not requires the motor to be cleaned only that it is configured to be cleaned, and the apparatus is not limited by methods of cleaning such as washing the interior of the motor, removing the washing fluid, and driving off the residual fluid set forth in the second invention.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Peri (US 3750951). Peri teaches an unsealed, open motor for a dishwasher which include the steps of inserting a washing fluid into the motor (inherently washing the motor), removing the fluid, and operating the motor after draining (inherently drying and protecting against failure) (col. 5, line 40).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Peri (US 3750951) and Selders (Electric Motors – Lubrication and Cleaning). Peri teaches every aspect of the invention except periodically removing the motor to be cleaned. Selders teaches disassembly of the motorized device to provide a through cleaning. It is would have been obvious to a person of ordinary skill in the art at the time of the invention to remove the motor from the apparatus prior to cleaning to clean foreign matter from the motor, as taught by Selders.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai whose telephone number is (571) 272 - 2036.

The examiner can be normally contacted on Monday through Friday from 8:00 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Darren Schuberg, can be reached at (571) 272 - 2044. The facsimile number for the Group is (571) 273 - 8300.
